Flame resistance for serial leather	DIN EN 1021 Part 1+2; ISO 8191-1; BS 5852 source 3; California TB 117 (Draft 02/2002)	
Other higher flammability provided upon request		

IMPERIAL CROWN

IMPERIAL CROWN by Boxmark is an exclusive natural thick leather with an embossed, natural milled grain and an easy care protective wax coating available in 17 different colours. Due to its embossed grain structure, IMPERIAL CROWN is often used for both modern clean lines and also classically elegant styles.

Characteristics

IMPERIAL CROWN with a thickness of 1.6 - 1.8 mm is superbly at home in exclusive living areas. IMPERIAL CROWN has excellent performance characteristics due to the special waxed surface finish. IMPERIAL CROWN has excellent tensile strength, tear and kink resistance as only Central European bull skins are used exclusively for the raw material. The average size for one skin is approximately 5.4m², which guarantees tailor made cutting results.

Care & Cleaning

Boxmark recommends exclusive use of the IMPERIAL wax after care set in order to retain the particularly waxy character of the leather and its sophisticated appearance in the best possible way. It is inadvisable to use other leather care products as they may cause damage to the leather.
