Nail varnish	Use nail polish remover on a clean cloth. For persistent stains use nitre diluent. Absorb as much as possible with kitchen paper, shampoo

CARE AND CLEANING

Due to its natural characteristics, Dinamica© does not stain easily. It is however advisable to remove dust regularly using either a soft brush or vacuum cleaner. Wipe with a damp cloth, allow to dry then brush to raise the pile. For more thorough cleaning, proceed as follows:

Upholstered furniture with non-removable covers:

Spray and rub the fabric with a dry foam upholstery cleaner.

Upholstered furniture with removable covers:

Hand or machine wash: lukewarm water (max.60 °C) or delicate cycle using mild detergent. Do not wring or spin. Hang to dry in the shade. If necessary, iron with a steam iron set at the temperature for rayon/synthetics and use a damp pressing cloth. Brush to raise the pile.

Care and cleaning:

STAIN REMOVAL

To remove small stains, please refer to our Stain Removal Table. Should you wish to use solvents not mentioned here, spot test on a hidden area.

Whatever the stain may be, you have to:

1. Act quickly
2. Start cleaning from the outside of the stain towards the centre to avoid a halo effect;
3. Identify the type of stain and proceed in accordance with our Stain Removal Table;
4. If using a solvent, do not pour directly onto the fabric but onto a clean white cloth;
5. Do not sit on the fabric or brush it until it is completely dry. When dry, use a soft brush to raise the pile.
